

# Leading Media House Fortifies Network

NDTV defends business via SonicWall's next-generation firewalls and the Capture Advanced Threat Protection cloud sandbox for a smooth, secure and uninterrupted network

## Business Need

Confronted by the cyber hazards of being in the media and sourcing news content from popular social sites, NDTV understood their vulnerability to cyber-attacks. NDTV required a security solution that would go beyond preventing malware from entering the network, but also offer real-time intelligence on potential threats. Such information would mean zero disruption of network, no loss of content and plenty of dollars saved.

## Solution

NDTV deployed SonicWall NSA 5600 next-generation firewalls in high availability, along with the SonicWall Capture Advanced Threat Protection (ATP) sandbox service. The company opted for the same solution in all three offices in the country.

## Results

"SonicWall's solution has been like a rugged engine that does its job quietly," says Dinesh Singh, Chief Technology Officer, NDTV. "It works 24/7 without needing supervision and inspires confidence to be connected to world and deliver quality content."

## Benefits

- Enhanced security and performance
- Top-drawer support before and after sale
- Improved reliability and reduced costs

## Solutions at a glance

- [SonicWall NSA 5600 Firewall in HA with Capture ATP...](#)

"We studied multiple vendors and found SonicWall's offering the most rugged and confidence-inspiring. We can count on their firewall for a disruption-free network."

*Dinesh Singh, CTO, NDTV.*
